

Student Activities

Current Seasons

- Baseball and track continued post-season competition this weekend.

Equipment or Facilities

- Facilities improvements on the short-term plan:
 1. Football press box improvements - RFQ is out. Pursuing a quote for renovation of the football press box, to include new flooring, counters, drywall, heating/AC, separation walls (noise control), and new windows on the front that improve lines of sight.
 2. The new softball storage shed is complete. Tony Snelling poured the pad last fall and Rich Green's class completed construction this past week.
 3. Seeking cost estimate to transform the area under the football bleachers into a finished storage shed for the Gaiter, side-by-side, tractor, and mower, with concrete floor and overhead doors to eliminate birds and as many pests as possible. This would replace the need for a new football/track storage shed as it should provide adequate space.
 4. Still scheduled -- Upgrade to the elementary gym to install electric controllers for raising and lowering the rims, install new backboards, and move the existing backboards to the side rims to replace the oldest backboards.
